Indian Green Building Council (IGBC)

Annual Review : 2016 - 2017
Vision of Indian Green Building Council (IGBC)

“Enable sustainable built environment for all and facilitate India to be one of the global leaders in sustainable built environment by 2025.”
Message from Chairman, CII-Godrej GBC

“Indian industry strongly believes that going green makes good business sense. Going green is good for individuals, community and the Nation at large.”

Dear Friends,

Today, Indian industry has demonstrated its leadership in various sectors. Indian industry's new growth paradigm is based on environmental sustainability and an earth-centric approach. This indeed is a step in the right direction.

CII is fully aware that economic development and environment can and should go hand-in-hand to ensure all-round sustainable development of the Country. CII Sohrabji Godrej Green Business Centre was established to offer a gamut of green advisory services to Indian industry. Today, the Centre is globally acknowledged as the pioneer of green building movement in India.

It is with the untiring efforts of Dr Prem C Jain and other leaders at IGBC that India is seen as one of the global leaders in green built environment. Building on the success story of green buildings, we have extended the concept of green building rating to industrial sector. CII successfully launched GreenCo (Green Company) rating System, the first of its kind in the world, which is evoking excellent response.

Indian industry strongly believes that going green makes good business sense. Going green is good for individuals, community and the Nation at large. India has the wherewithal and resources to chalk out an inspiring and fulfilling green journey.

I invite you to partner with CII in building a vibrant and environmentally sustainable India!

Jamshyd N Godrej
Chairman, CII Godrej GBC
Message from Chairman, World Green Building Council

“ THEIR PASSION, CONVINCION, MULTI-PRONGED APPROACH IN BUILDING A GREENER AND HEALTHIER PLANET EARTH IS INSPIRING! ”

Dear Friends,

Over the last few years, my interactions with team IndiaGBC has offered me new perspectives on how a dedicated band of team members can bring in a quality shift and focus in the way buildings are designed. I am very happy to mention that, IndiaGBC with over 4,200 registered projects, amounting to over 4.66 Billion sq.ft is contributing immensely to the global green building movement. I heartily appreciate everyone for being part of the green journey.

Team IndiaGBC has been partnering with WorldGBC right from the initial days. Their passion, conviction, multi-pronged approach in building a greener and healthier Planet Earth is inspiring! I heartily appreciate Dr Prem C Jain and all the vibrant and dynamic leaders of IndiaGBC for making a difference and for ushering in a paradigm shift in the design and construction of green buildings.

As we move ahead, India’s responsibility towards global community is becoming increasingly important. IndiaGBC has a lot to share and contribute to the global community and I look forward working together on the global green building movement.

Best wishes,

Tai Lee Siang
Chairman, World Green Building Council

Message from Founding Chairman, IGBC

Today, IGBC has enabled India script many new milestones and redefine the contours of constructing process and approaches.

ParasuRaman R
Founding Chairman, IGBC
Message from Founding Chairman, IGBC

“Today, IGBC has enabled India script many new milestones and re-define the contours of constructing process and approaches.”

Dear Friends,

It is fulfilling to witness the growth and spread of green building movement in India. Over 15 years ago, a team of passionate and committed friends huddled together to chalk out a new green growth paradigm for Indian construction industry.

Now as I reflect upon the green journey, I realise that each step was inspiring and fulfilling to all of us at IGBC. Today, IGBC has enabled India script many new milestones and re-define the contours of constructing process and approaches.

Green building movement has become stronger with the launch of GreenPro (Green Product) certification in the year 2015. GreenPro aims to promote green building products, material and technologies. As I pen this message, over 170 products are GreenPro certified and many others are in the pipeline. As we go ahead, we would extend GreenPro certification to technologies and perhaps to consumer goods. This augurs well for the people and the Country at large.

We look forward to your continued support and involvement in taking forward the green agenda of IGBC.

ParasuRaman R
Founding Chairman, IGBC
Dear Friends,

Season’s Greetings from IGBC!!

Just over 15 years ago, a handful of us were huddled together to design and build the first certified Green Building in India. The mission was to create the Greennest Business Centre on the planet. We were hand-picked based on long years of delivering projects fulfilling similar requirements. Using the age old practices of open courtyard for day-light harnessing, sheetal minar for indirect evaporative cooling of hot and arid air of Hyderabad, root zone treatment for grey and black water recycling; and the state of the art technologies of double glass for bringing light without heat ingress, waterless urinals for water conservation and solar PV for power generation, we achieved the seemingly impossible.

The phenomenal success of our maiden venture fired our imagination. IGBC laid down the mission of building a greener and healthier India (Bharat as I love to call our country), where buildings optimize the Panchbhutas (the five elements of Nature), where all regions and all sections of the society build using regional materials and traditional construction practices – all in harmony with Nature, leading Bharat to be once again the Jagat Guru in preserving all life forms on our Mother Earth.

Starting with a meagre 20,000 sq.ft of our first certified green building, India today stands tall amongst peers around the world, with 4.66 Billion Sq.Ft registered green footprint with IGBC. And the glorious journey has only begun.

We have launched 21 IGBC Green ratings systems, one for each type of application - office, home, affordable housing, school, hospital, underground metro station, railway station, factory, village or township. IGBC strength is our distributed knowledge centres through more than 20 IGBC chapters and more than one hundred student chapters, from Guwahati to Pune, from Chandigarh to Cochin, each driven by doyens of construction industry, giving their time generously and selflessly to bring back “Green – Our Way of Life”.

This year we are hosting the World Green Building Council Board Meeting and Asia Pacific Network Meet, with our annual flagship event Green Building Congress 2017, in Jaipur, on 4-7 October, 2017. 30 Country Councils are participating. A very warm welcome to our international guests to our beloved Bharat.

My profound gratitude to all my colleagues, leading IGBC with all their heart - Chairs, Co-Chairs, Executive Committee Members, Project Proponents, Sponsors of various events throughout the year, and all those who are treading the Path of Green in our inspiring green journey.

Buoyed by the great enthusiasm of all our Humrahees, IGBC plans to lead the world, with 10 Billion Sq.Ft of Registered Green Footprint by 2022, when we celebrate 75 years of India’s Independence.

And Tomorrow Will Be Ours!!

Dr Prem C Jain
Chairman, Indian Green Building Council

Lucknow Metro Rail Corporation (LMRC)

LMRC became the first Government entity in Lucknow region and the first one in Transport sector in U.P. to attain IGBC’s Platinum rating.

With benefits ranging from water conservation, energy efficiency, use of renewable energy, rainwater harvesting, material conservation, commuter facilities – LMRC’s Platinum certified stations are set to provide world-class experience to the people of Lucknow.

First IGBC Platinum rated Data Center

ICICI Bank Data Center in Hyderabad gained the unique distinction of becoming India’s first Platinum rated project to be rated under IGBC Green Data Center Rating System. The Rating System would facilitate in providing tremendous tangible and intangible benefits.

Workshops on Partial Risk Sharing Facility (PRSF) for Financing Energy Efficiency Projects in Building Sector

IGBC in partnership with Small Industries Development Bank of India (SIDBI) organised workshops & B2B interactions in Hyderabad, Mumbai, Bangalore and Delhi. The workshops aimed at promoting investments in enhancing energy efficiency in existing building projects.
IGBC in its efforts to disseminate information on 'methods of optimizing built - environment performance' has instituted the IGBC Green League (IGL) in 2016. IGL involves series of awareness sessions (on Saturdays), followed by a quiz competition.

Encouraged by last year's response, this year too IGBC has organised the 2nd edition of IGBC Green League in Bangalore, Chennai, Kolkata and Mumbai. The response to this initiative has been overwhelming. The 2nd edition had the participation of 72 teams across the 4 locations.

Subsequently, all these teams will take part in the preliminary IGL quiz contest in September 2017 and the final competition will be organised at Green Building Congress 2017 on 6 October 2017. The top three winning teams will be awarded trips to Shangai, Singapore and Thailand respectively. All the participants will receive a certificate.

Building Efficiency Accelerator (BEA)

WorldGBC has awarded IGBC a project titled- Building Efficiency Accelerator (BEA) initiative for the City of Coimbatore. As part of the programme, IGBC organised one-day workshop on 8 March 2017 which has evoked excellent response from the stakeholders.

Mr Rajesh B Lund, Chairman, IGBC Coimbatore chapter and Col.(Veteran) A Sridharan, VSM, Co-Chair, IGBC Coimbatore were glad that Coimbatore was selected for this important project.

Report: "Impact of Green Buildings on Occupants Wellbeing"

WorldGBC as part of its 'Better Places for People Campaign' has awarded IGBC to conduct a research project titled- 'Impact of green buildings on occupant's well-being in India'. The objective of the project was to understand the perceptions of people living and working in Green buildings and use the information to strengthen the case for health, comfort, hygiene and well-being in Green buildings in India.

The final project report captured the experiences of occupants in 25 IGBC rated green building projects, covering 7 major cities in India. Following are the highlights of the survey:

- 80% occupants are thermally comfortable throughout the year on account of the good design and proper operation of the facilities
- People in Green buildings accord tremendous importance to fitness activities. 84% occupants actively utilise sports and meditation facilities provided by their facility
- Due to good façade design, 89% occupants are happy with the visual environment and do not have problem of glare.
- 78% occupants are satisfied with the acoustical design of their facility.
- Educating the occupants of green buildings is extremely important. 93% occupants were found to be well educated on the various benefits of eco-friendly practices

Regional Chair of Asia Pacific Regional Network

Mr Sundaresan Raghupathy, Deputy Director General of CII and in-charge of Indian Green Building Council (IGBC) was elected as Regional Chair of the Asia Pacific Regional Network - a group of 15 Green Building Councils currently working to advance green buildings within the region.

Mr Raghupathy, who is already a Board Member of World Green Building Council (WorldGBC), has been appointed for his leadership in the Green building movement and dedication to improving the sustainability of buildings, both at regional level and National level.

Inspiring young minds become the green ambassadors of the Country, since 2007

Glimpses of Green Your School Contest and awareness programmes

IGBC in partnership with Daikin is encouraging young architectural students to don their thinking caps on sustainability. The topics for the competition over the years ranged from - Designing a Home for 2035, A Treehouse, Designing with waste, A Green School, Shelters for construction workers. All these editions have generated plenty of enthusiasm among the community for budding designers. This unique initiative of Daikin is enabling young minds to pursue a career in green buildings and built environment.

Glimpses of Emerson Cup - Over the Years

Emerson partners with IGBC to reward outstanding talent within the HVACR industry
India Celebrates World Green Building Week 2017

This building has a secret. It’s a climate hero.

Buildings account for over 40% of global carbon emissions. But not every building is highly efficient and uses clean energy. Let’s make all buildings not just green but efficient, and win the fight against climate change.

India Celebrates World Green Building Week 2017

About CII

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering industry, Government, and civil society, through advisory and consultative processes.

CII is a non-government, not-for-profit, industry-led and industry-managed organization, playing a proactive role in India’s development process. Founded in 1895, India’s premier business association has over 8,500 members, from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 200,000 enterprises from around 250 national and regional sectoral industry bodies.

CII charts change by working closely with Government on policy issues, interfacing with thought leaders, and enhancing efficiency, competitiveness and business opportunities for industry through a range of specialized services and strategic global linkages. It also provides a platform for consensus-building and networking on key issues.

Extending its agenda beyond business, CII assists industry to identify and execute corporate citizenship programmes. Partnerships with civil society organizations carry forward corporate initiatives for integrated and inclusive development across diverse domains including affirmative action, healthcare, education, livelihood, diversity management, skill development, water and empowerment of women to name a few.

The CII theme for 2017-18, India Together: Inclusive. Ahead. Responsible emphasizes Industry’s role in partnering Government to accelerate India’s growth and development. The focus will be on key enablers such as job creation; skill development and training; affirmative action; women parity; new models of development; sustainability; corporate social responsibility, governance and transparency.

About IGBC

The Indian Green Building Council (IGBC), part of the Confederation of Indian Industry (CII) was formed in the year 2001. The vision of the council is, "To enable a sustainable built environment for all and facilitate India to be one of the global leaders in the sustainable built environment by 2025".

The council offers a wide array of services which include developing new green building rating programmes, certification services and green building training programmes. The council also organizes Green Building Congress, its annual flagship event on green buildings.

The council is committee-based, member-driven and consensus-focused. All the stakeholders of construction industry comprising of architects, developers, product manufacturers, corporate, Government, academia and nodal agencies participate in the council activities through local chapters. The council also closely works with several State Governments, Central Government, World Green Building Council, bilateral multi-lateral agencies in promoting green building concepts in the country.
